REPORT MANAGER

**QlikView
Version 10+
MS-Office 2010**

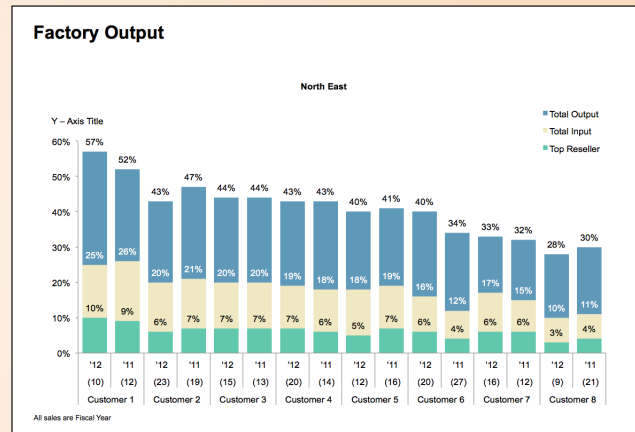

Report Manager's Enterprise Reporting solution provides a secure, scalable, and centralized platform for creating, scheduling, and distributing pre-built reports based on MS-Office®.

Reports are generated using Excel, Word, and Powerpoint templates. Once these templates are created, Report Manager can automatically extract the data and populate these templates.

Generate Reports 4 Ways:

- **On-Demand** – Add Buttons to your Tableau or QlikView Dashboards allowing users to create reports based on their current selections
- **Scheduled** – Based on a date and time of day
- Via our Reporting Portal
- Programmatically via API call

Adding buttons to your dashboard is one of the most popular ways to have reports execute. Our on-demand reporting will generate reports based on the users current selection.

Sample report from PowerPoint.

Major Factor Condition	Active	Current	Prior	12-Month Peer	Change %	Warranty	Factory Output	Non-Warranty
Exams and Preventive Services	287	32.3%	30.4%	0%	\$16.58	\$11.65	---	---

REPORT MANAGER

Colorful and Powerful Reports in Minutes

- **Produce beautifully formatted reports** based on MS Office templates.
- **Highly scalable** – generate thousands of reports.
- **On-Demand reports** can be setup by simply placing a button into your existing Tableau or QlikView dashboards that will generate the report requested immediately based on the current user's selections.
- **Consolidate reports** – Report Manager works with multiple data sources. (Tableau, QlikView, Oracle, MS-SQL server, flat files)
- **Fixed schedule reports** can be scheduled hourly, daily, weekly, monthly, yearly or any combination!
- **Full security model**

Flexible and Powerful User Interface

Reports can be generated using our drag and drop interface for simple to medium complexity reports. A full scripting language enables expert users to create very complex reports.

Departmental Self-Service Capabilities

CIA's Report Manager can be setup with a central IT controlled model or setup to allow individual departmental self-service. IT can control which departments have access to which data sources and files and which report templates. In this model departments can manage their own reports and report distributions.

Centralized Management Capabilities

Including auditing, load balancing, administration and scheduling.
